It's also introduced an industry compatible keymap so that if you're switching over from another 3D app, you should find that all the keyboard shortcuts you've learned over the years do exactly what you expect, rather than something completely random and unexpected. New keymaps as well as templates and workspaces make it much easier to create in Blender 2.80 (Image credit: Blender)The new version gives you a choice between multiple application templates depending on the nature of your project, as well as workspaces providing different screen layouts to accommodate various tasks.
